

Dorset Axemen Arena Requirements

Prior to our display we must do a certain amount of preparation work within the confines of the arena. To save unnecessary heavy lifting of our stands and to maximise the time allowed for the Axemen's display in the arena, it would help if we could set up the log stands and the tree-climb pole at the beginning of the event and not have to move them in and out of the arena for each display. If an area could be roped off, there are four possible arena options which are acceptable to us.

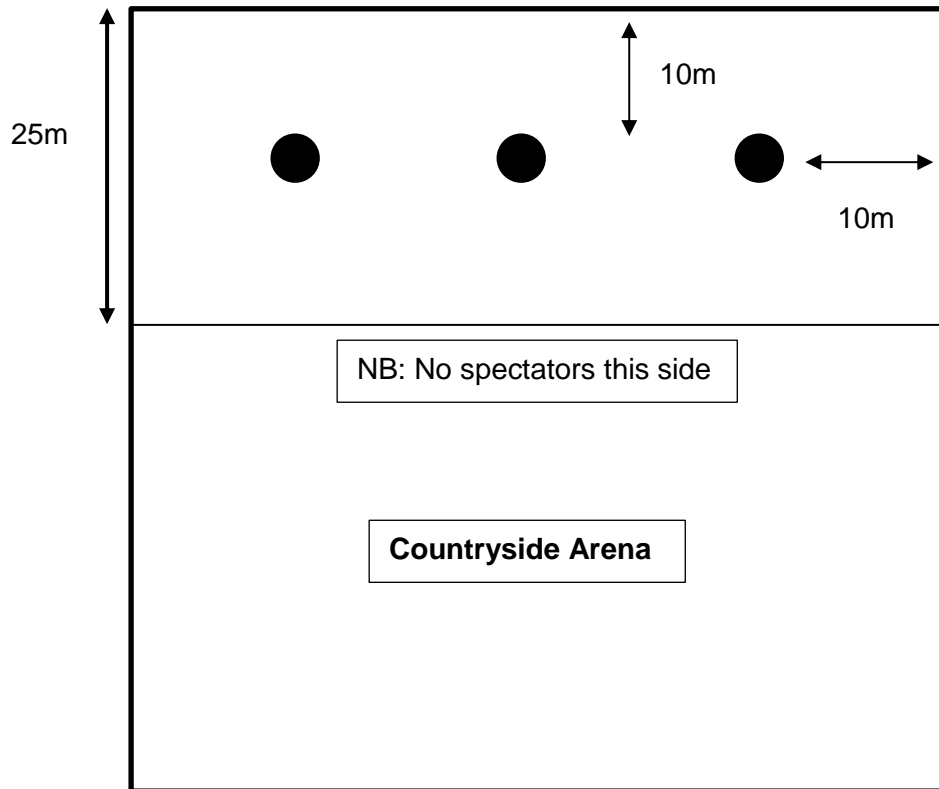

1. Axemen's own arena
2. Shared arena using either end
3. Shared arena using either side
4. A corner of a large Rally Arena

Option 1 – Axemen's own arena

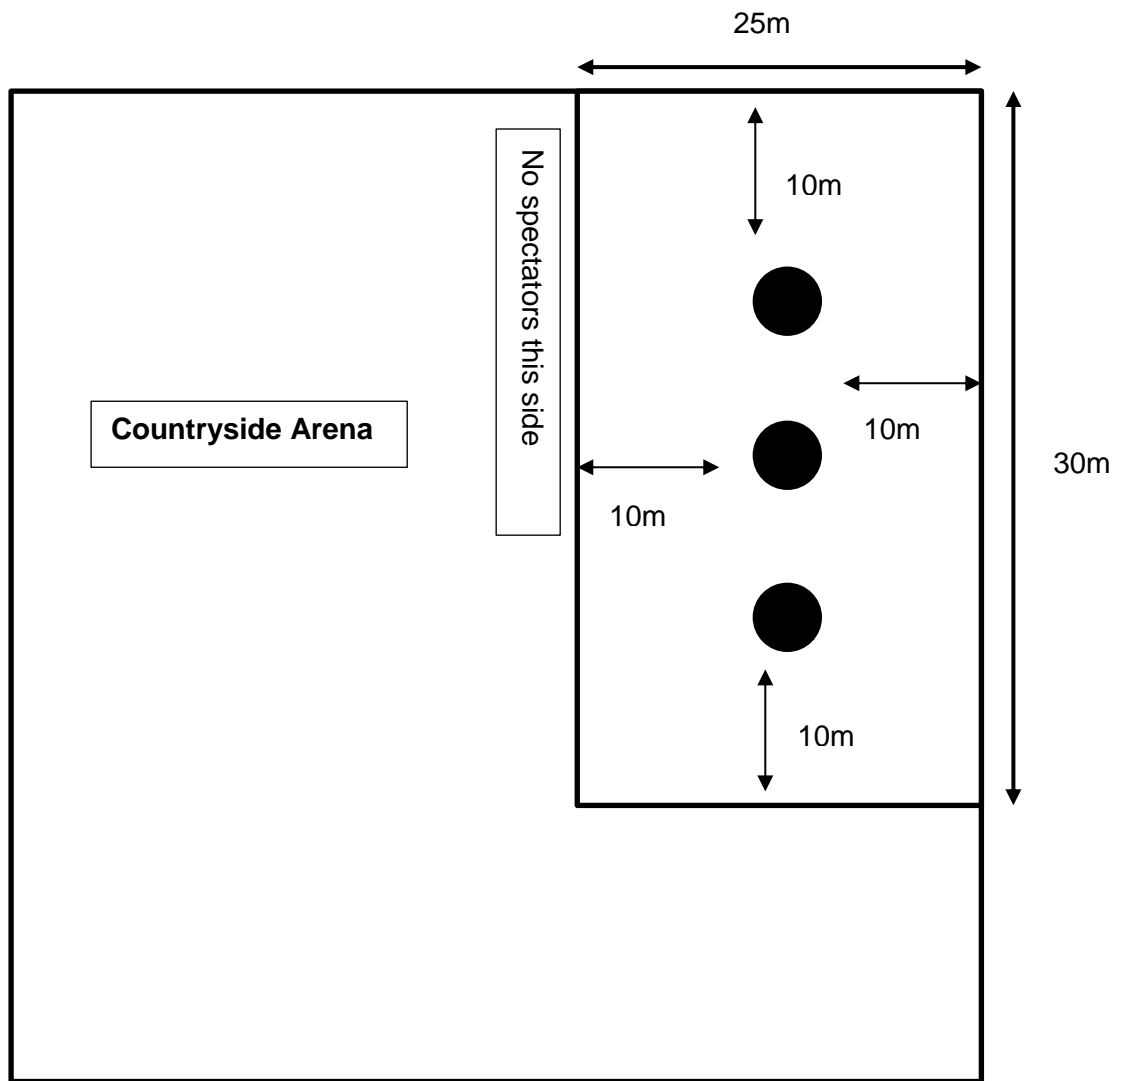

Note – No spectators to be within 10 meters of the equipment.

Option 2 – Shared Arena using either end

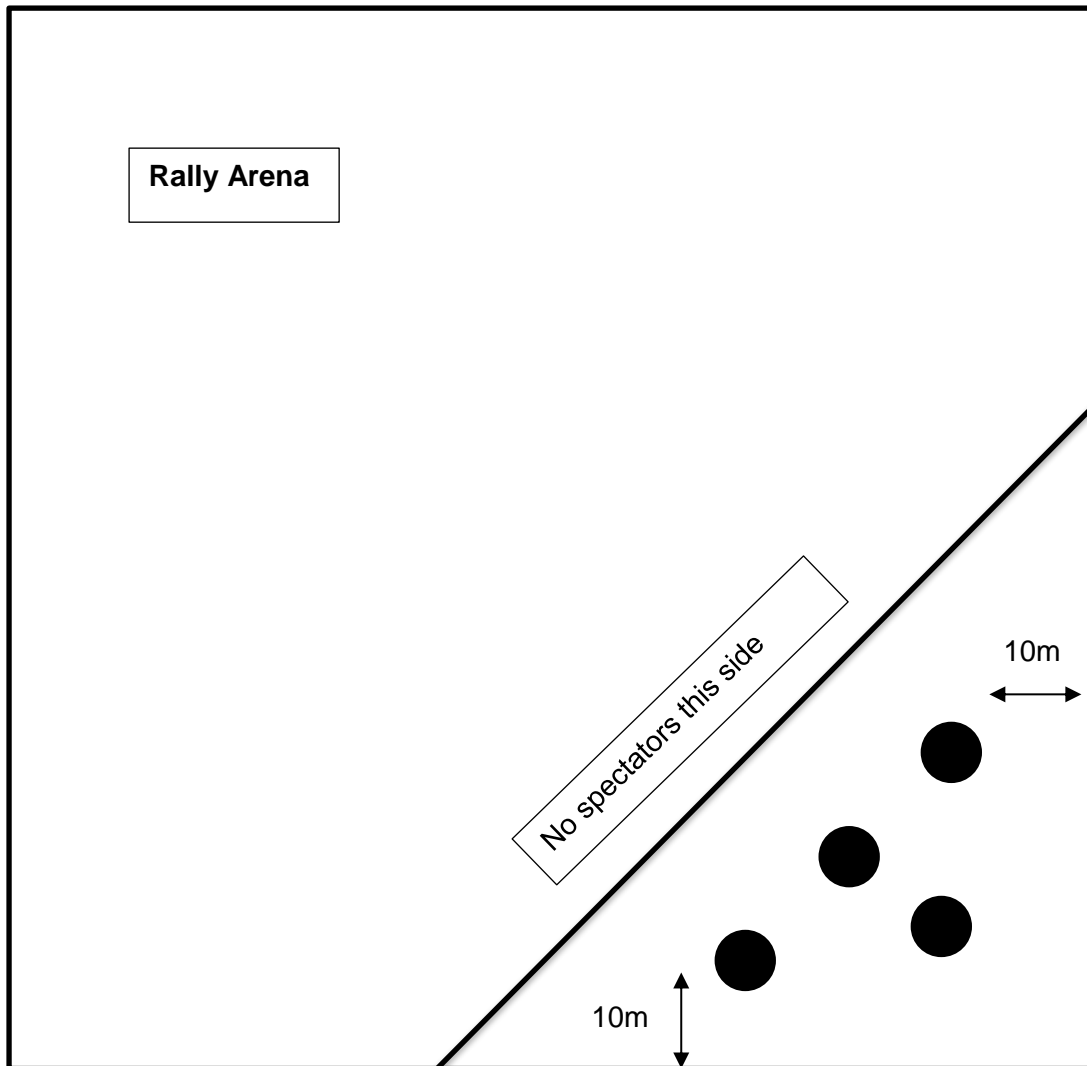

Note – No spectators to be within 10 meters of the equipment.

Option 3 – Shared Arena using either side

Note – No spectators to be within 10 meters of the equipment.

Option 4 – Corner of a large Rally Arena

Note – No spectators to be within 10 meters of the equipment.
